

EmGuard.

Hinge (Outside)

Scored (Inside)

Congratulations On Choosing EmGuard

To ensure that EmGuard performs to its maximum potential, it is important that it is folded the right way.

EmGuard has been scored with three fold lines. Please make certain that the scored lines are facing inwards when folding, as this ensures maximum strength along the fold lines.

Once folded, line up the holes and insert bamboo stake as illustrated.

Place the guard over the plant, ensuring the entire plant is contained within the guard and push the stake firmly into the ground.

Please be careful with the stakes, particularly around your eyes.

Refer to pictures above for folding technique.
