

EmGuard
Because we care

100% BIODEGRADABLE PLANT GUARD SYSTEM

EmGuard™ are robust, biodegradable plant guards developed as a solution to plastic planting debris entering waterways. Installed together with Terra Lana Wool DagMats, they are an ideal, natural and highly effective plant establishment system. Maximize your plant survival rates, boost growth and save costs. Easy to install with a single 900mm bamboo pole.

Biodegradable Nothing but simple unbleached Cardboard, bamboo and dag wool means no more nasty residues left in our soils or waterways

Wool Power Terra Lana Wool DagMats provide 6–12months+ weed suppression, help retain ground moisture, protect roots from frost and biodegrade releasing nutrients to boost growth

Eco Sourced Made of majority recycled pulp and Terra Lana dag wool sourced direct from local farmers—reducing transport & processing

Easy Install The EmGuard & DagMat system is quick and easy to install—slip the DagMat around the base and fix the EmGuard using a single pole. No need to remove afterwards!

Made in NZ Manufactured by NZ companies in NZ facilities for quality, dependable supply and economic & environmental sustainability

Save all Round Greater growth & survival, less maintenance needed, no removal and better weed suppression all means reduced costs.

Plant Protection

Plant guards have been shown to greatly improve the chances of survival and promote growth in plants. They reduce on-going maintenance time and costs by protecting plants from predators like hares and pukekos, or damage from weedeaters and sprays.

They also make plantings visible and provide a micro-climate favourable to growth, particularly beneficial in the first year.

Specifications

EmGuard™ will last for more than one year in normal riparian conditions, securely fix with a single 900mm stake, then break down—no need to be removed once plants are established. The guard is coated with a food safe, FDA compliant moisture barrier to extend life. EmGuard™ fold to a triangle of three 350 x 200mm sides, with two logo cutouts allowing more light. DagMats are 100% dag wool, 250mm square and are pre-slit for plant & poles.
